

**Press Release** 

## Notice of Administrative Changes and Transfer of Personnel

Shiseido Company, Limited hereby announces that it will implement partial organizational reforms and personnel transfers as detailed below, effective January 1, 2022.

## 1. Partial Organizational Reforms

(1) New establishment of the People Division

In order to embody Shiseido's "PEOPLE FIRST" credo, a new "People Division" will be established to oversee all personnel-related operations such as human resources development, recruitment, compensation, welfare, and management operations. Within this division, the "People Planning Department," "People Operations Department," "People and Organization Development Department," and "Business Partner Department" will also be established. The "People Planning Department," while promoting the talent acquisition and wellness, will utilize and analyze personnel data as part of DX initiatives to develop the organizational/human capital strategies and lead the implementation of reforms. The "People Operation Department" will integrate a wide range of functions from the planning to the operation of the treatment and compensation system, provide One-Stop HC services related to human capital internally, and collectively implement the total labor relations. Upon the instatement of the above division, the Human Resources Department will be dissolved.

- (2) Dissolution of the Social Value Creation Division and enhancement of three affiliated Departments In order to strengthen the functions of the Social Value Creation Division, the following three Departments will be established. Upon their instatement, the Social Value Creation Division will be dissolved for the creation of a better overall organization.
- (A) New establishment of the Sustainability Strategy Acceleration Department
  In order to further strengthen the development and implementation of the sustainability strategies, the
  "Sustainability Strategy Acceleration Department" will be established within the "Corporate Transformation Acceleration Division" to handle functions of the company-wide management strategy.
- (B) New establishment of the D&I Strategy Acceleration Department The "D&I Strategy Acceleration Department" will be newly established for the further strengthening of Shiseido's Diversity & Inclusion (D&I) activities both internally and externally.
- (C) New establishment of the Art & Heritage Management Department

The "Art & Heritage Management Department" will be newly established with the aim of strengthening at the global level the value communication function of "Art & Heritage," which is an important asset to our company, and we will promote its furthered utilization for the creation of business value around the world.

(3) New establishment of the Inner Beauty Business Division

The current Inner Beauty Business Development Department will be reorganized to the "Inner Beauty Business Division," and the "Brand Marketing Department" will be newly established therein in order to advance the vision of becoming a "PERSONAL BEAUTY WELLNESS COMPANY" by 2030 and the world's No. 1 Skin Beauty Company. The Division will take the lead in establishing the foundation and new business development in the inner beauty category, which creates synergies with our core business, cosmetics.

## (4) Strengthening of the functions of the Clé de Peau Beauté Global Brand Unit

In order to improve brand equity and accelerate further growth of the *Clé de Peau Beauté* brand business, the functions within the Clé de Peau Beauté Global Brand Unit will be reorganized, and the "Strategy and Business Development Department" and the "Communication Development Department" will be newly established. In association with the above, the Business Planning Department will be dissolved.

(5) New establishment of the Global Premium Brands Unit

The management of the two brands, *ANESSA* and *ELIXIR*, which are currently marketed mainly in Asia, will be consolidated under the newly established "Global Premium Brands Unit" as a step toward enhancing Shiseido's future growth in Asia and other regions and introducing the above brands into new markets.

(6) New establishment of the Regulatory Strategy Department

Given the increasing importance of a company's ability to comply with global regulations related to chemical substances, environment, and sustainability in addition to the Japanese Pharmaceutical and Medical Device Act, the "Regulatory Strategy Department" will be newly established in order to enhance such capabilities within the company. The Department will integrate the functions related to regulations, applications, label appeals, industry association activities, and others.

(7) Adjustment and reorganization of the functions in the area of the supply network

The functions of the current Production Department will be adjusted and redefined with the new establishment of the "Safety, Quality & Sustainability Department" that will ensure safety, superior quality and sustainable supply on a global level, and the "Manufacturing Technology & Innovation Department" that will bring innovation in production (MONOZUKURI). Moreover, the "JAPAN Industrial Planning Department" will be newly established for the purpose of developing comprehensive production and raw material procurement plans for the factories in Japan. In association with the above, the Production Department and the Demand & Supply Planning Department will be dissolved.
