

## JSID's Fellowship Shiseido Research Grant 2019 Winner

Name : Takuya Takeichi, M.D., Ph.D.

Affiliation: Department of Dermatology, Nagoya University  
Graduate School of Medicine

Research subject :

To establish a new treatment to control  
autoinflammatory keratinization diseases

Biography : 2004 (Mar.)

Shiga University of Medical Science (M.D.)

2004 (May)-2006 (Mar.)

Resident, Koseiren Showa Hospital

2006 (Apr.)-2007 (Mar.)

Clinical fellow, Department of Dermatology, Nagoya University Hospital

2007 (Sep.)-2008 (Mar.)

Clinical fellow, Department of Dermatology, Toyohashi City Hospital

2010 (Sep.)

Dermatology, Nagoya University Graduate School of Medicine (Ph.D.)

2011 (Apr.)-2013 (Mar.)

Clinical fellow, Department of Dermatology, Inazawa City Hospital

2013 (Mar.)-2015 (Feb.)

Visiting research fellow, Genetic skin disease group, St John's institute of  
Dermatology, King's College London

2015 (Apr.)-2016 (Mar.)

Clinical fellow, Department of Dermatology, Nagoya University Hospital

2016 (Apr.)-present

Research Associate, Department of Dermatology, Nagoya University Hospital

Comments :

It is my great honor to be chosen for this award. Recently, we proposed a new umbrella term, "autoinflammatory keratinization diseases (AiKD)", to encompass inflammatory keratinization disorders with autoinflammatory pathogenic mechanisms. I am passionate about contributing to the development of dermatological science and about finding clues for the innovation of novel therapies for AiKD. I greatly appreciate the Shiseido Company, the board members of JSID, the support of my team members and family.
