

## Shiseido Group Sustainable Raw Materials Procurement Guidelines

For palm-derived raw materials, known for their increasing impact on the environment and problems with human rights abuses in the countries of origin, the Shiseido Group Sustainable Raw Materials Procurement Guidelines have been established to promote sustainable procurement as specified in the Shiseido Group Global Procurement Policy.

- **Palm oil**

For palm-derived raw materials and paper that Shiseido purchases, we will promote procurement with due consideration to environmental conservation at the place of origin, as well as with respect for human rights.

**Target:** By 2026, for all palm-derived raw materials that Shiseido purchases, we will accomplish procurement with due consideration of environmental conservation at the place of origin, as well as with respect for human rights. This will be achieved by procurement of RSPO certified materials from physical supply chain options, Identity Preserved, Segregated and/or Mass Balance.

In addition, Shiseido Group factories will acquire RSPO supply chain certification.

- **Paper**

To protect the environment and prevent deforestation, we are promoting the procurement of sustainable paper.

**Target:** By 2023, we will switch 100% of the paper used for Shiseido products to (third-party) certified paper (e.g. FSC, PEFC), recycled paper or non-wood paper for all Shiseido products.
