

JSID's Fellowship Shiseido Research Grant 2018 Winner

The award ceremony will be held at the 44th Annual Meeting of the Japanese Society for Investigative Dermatology.

Date and Time: 8th November 2019 (Friday) 2:50 p.m.

Venue: Hotel Aomori RoomA

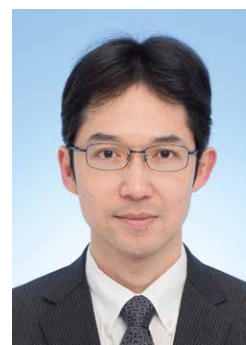

The winners will present their research results at the same meeting (Poster Venue).

Name : Hideyuki Ujiie, M.D., Ph.D.

Affiliation: Department of Dermatology, Hokkaido University
Graduate School of Medicine

Research subject :

Investigation into the mechanism of autoantibody
production in autoimmune blistering disorders

Biography : 2002 (Mar.)

Hokkaido Univ. School of Medicine (M.D.)

2002 (May)-2005 (Mar.)

Resident, Dept. of Dermatology, Hokkaido Univ. Hospital

2005 (Apr.)-2006 (Mar.)

Resident, Dept. of Dermatology, Hokkaido Cancer Center

2010 (Mar.)

Hokkaido Univ. Graduate School of Medicine (Ph.D.)

2012 (Sep.)-2014 (Aug.)

Visiting fellow, Laboratory of Immunology (Dr. Ethan Shevach), NIAID, NIH, USA

2014 (Sep.)-2016 (Aug.)

Assistant professor, Dept. of Dermatology, Hokkaido Univ. Graduate School of
Medicine

2016 (Sep.)-present

Lecturer, Dept. of Dermatology, Hokkaido Univ. Graduate School of Medicine

Comments :

It is a great honor to receive the JSID's Fellowship Shiseido Research Grant 2018. I research autoimmune blistering disorders, especially bullous pemphigoid (BP). I'm interested in how autoantibodies to BP180 and BP230 are generated in BP. By focusing on regulatory T cells and the aging alteration of immune systems, I'm working to elucidate the mechanism behind the breakdown of self-tolerance to BP antigens. I really appreciate the support of Shiseido, the selection committee, and my mentors and colleagues in this research project.
